PROJECTS

Neural Net GUI

Fall 2017

I made a website for demonstrating simple neural networks using HTML, CSS, JavaScript, jQuery, Three.js, and WebGL. Users can completely configure the network, including how many layers there are and the neuron count in each layer.

iRobotics Competition Robot

2015 - 2017

Along with a team of two other people, I developed the software for the MRDC competition robot. This included writing an Arduino C program, a C# program, and creating a serial communication protocol for XBee radios.

Autonomous Robot

Fall 2016

Along with two other students, I developed a C++ program running on a Raspberry Pi to control an iRobot Create® 2 Programmable Robot to autonomously follow along a wall using sensors and scan the environment for specific images, using OpenCV.

LEADERSHIP

iRobotics Controls Technical Lead

2016 - 2017

- Coordinated and taught 12 hrs of technical workshops for engineering students
- Taught engineering students how to program electronics for controlling robots
- Wrote base code for other teams to build from

iRobotics Midwestern Robotics Design Competition Programming Captain

2015 - 2017

- Built a robot to complete various tasks in competition
- Led the programming sub-team of one of the MRDC teams
- Won 2nd place in the 28th annual Jerry Sanders Design Competition

iRobotics Social Director

2016 - 2017

- Organized team building exercises for iRobotics teams
- Planned and carried out 10 social events to engage members' interests
- Co-hosted social events with students from multiple organizations
